

ENVIRONMENTAL POLICY

Independent Air Quality Consultancy Services Limited is committed to minimising the impact of its activities on the environment.

The key points of our strategy to achieve this are:

- Minimise waste by evaluating operations and ensuring they are as efficient as possible.
- Minimise toxic emissions through the selection, use and monitoring of its fleet and the source of its power requirement.
- Actively promote recycling both internally and amongst its customers and suppliers.
- Source and promote a product range to minimise the environmental impact of both production and distribution.
- Measure its impact on the environment and set targets for ongoing improvement.
- Providing appropriate resources and the necessary training for staff, and contractors if applicable, to ensure that they're able to fulfil the commitment given in this policy.
- A commitment to continual improvement, prevention of pollution and compliance with relevant environmental legislation and regulations and with other requirements through the ISO14001:2015 framework for setting and reviewing environmental objectives and targets.
